Education

National Institute Business Management, Sri Lanka

Diploma in Software Engineering (GPA: 3.84/4.0)

2024 - 2025

Kurunegala, Sri Lanka

National Institute Business Management, Sri Lanka

Higher National Diploma in Software Engineering

Apr 2025 - Apr 2026

Kurunegala, Sri Lanka

Projects

Remnantborn: The Last Tear – Multiplayer 3D RPG Game | [GitHub Repo](#)

Nov 2025 – Present

Unreal Engine 5.7, Supabase, Express.js, Render, Multiplayer Systems

- Developing a third-person multiplayer RPG with advanced rendering, real-time networking, and scalable backend architecture.
- Implemented Motion Matching, Animation Layers, and MetaHuman integration for realistic character systems.
- Designed modular combat and abilities using Unreal Gameplay Ability System (GAS) with multiplayer sync.
- Built and deployed an Express.js backend with Supabase for player data and session management.

Petify – AI-Powered Pet Care Platform | [Mobile](#) | [Backend](#) | [Admin](#)

Dec 2024 – Apr 2025

Flutter, FastAPI, MongoDB, React.js, Google APIs, Gemini API

- Developed a cross-platform pet care app with AI chatbot, pet store, and location-based lost-and-found tracking.
- Built scalable backend services using FastAPI and MongoDB with secure authentication and media handling.
- Created a React.js admin dashboard for efficient management of users, products, and pet data.

AI Robotics & IoT Systems | [Companion Robot](#) | [TempSense](#)

July 2025 – Jan 2026

Python, ESP32, Arduino, OpenCV, MediaPipe, Machine Learning, Flutter

- Developed an AI companion robot with real-time vision, voice interaction, and emotion-aware responses.
- Integrated ESP32 and Arduino via UART for motor control, servo gestures, and live camera streaming.
- Built TempSense, an ML-based smart cooling system with automated control and real-time monitoring.
- Designed Flutter apps for live control and interaction with IoT systems.

Machine Learning Projects (Cassava Disease & Income Prediction) | [GitHub Repo](#)

Apr 2026

Python, PyTorch, scikit-learn, Streamlit

- Built a cassava leaf disease classification system using CNN feature extraction and traditional ML models.
- Implemented data preprocessing, PCA, and model comparison (SVM, Random Forest, Logistic Regression).
- Developed an income prediction app with ML models and feature engineering using Streamlit.

Expo React Native, Express.js, Oracle DB, SQLite, AsyncStorage, REST API

- Built a mobile-first finance tracker with an animated glass-effect UI using Expo React Native, providing offline support via local SQLite and AsyncStorage.
- Developed a secure Express.js backend with Oracle database and RESTful API for real-time data synchronization.
- Implemented user authentication, expense/income tracking, and category management with smooth interactive animations.

Technical Skills

Languages: Dart, JavaScript, Java, HTML/CSS, C, Python, C++, C#

Databases: MySQL, MongoDB, Firebase, MSSQL, Supabase, Oracle, SQLite

Technologies/Frameworks: Node.js, RESTful APIs, Flutter, Unity(URP and HDRP), Unreal Engine, FastApi, ASP.NET, Expo React Native

Developer Tools: Git, VS Code, Dart DevTools, Swagger, Docker

Soft Skills: Problem Solving, Team Collaboration, Adaptability, Fast Learning, Project Management
